

Life in Amsterdam

An Extract From The Netherlands Government Information Bureau

A Hollandish who recently escaped from occupied Holland tells of the dreary aspect of the once gay, beautiful city of Amsterdam. Except for a few German army trucks and the cars of the hated German police there is no motor traffic. In the few quarters, which are marked with enormous billboards, the street view and sidewalk curbs have completely disappeared, there is nothing to sell any more. In the once gay and crowded streets you now see but a few persons, many on their faces, hurrying to get indoors in order to avoid contact with the German soldiers.

At the time our informant left the forced emigration of Jews had started. The victims were driven to the theatre and there, at night, were transported in street cars to the station, there to be loaded in a train for Poland. The entire population of Amsterdam shared the agony of the Jewish families thus deported. Tales of their sufferings infuriate the population and the growing German families. From the bombed Cologne and the Ruhr district are gradually arriving in Amsterdam.

When the Germans started to confiscate the houses of thousands of cyclists disappeared. Anyone who was unable to prove that it was necessary for him to have one promptly hid his.

The hiding of all kinds of property is a main concern with everyone. And many have to hide themselves from the police. The Germans have resented the dislike of the Giften have gone home any more but live in fear of the police. They sleep in the same place two nights and then move to another hiding. They dare not show themselves in public and wait anxiously and clandestinely for the days when the streets of Amsterdam will be filled with the joy of victory.

A Simple Ceremony

Tradition Of Royal Navy Upheld

When King R.M.A. was crowned, the ceremony was marked with simplicity, dignity and humility. The ceremony, which took place in the hall of the Royal Navy, was a simple one, a hymn, in the accompaniment of the Royal Marines band, and then came the bidding, the most ancient part of the ceremony.

"I have no ship," replied the captain.

"What do you fear, seeing that the God Father is with you?" asked the captain.

"I have no ship," replied the captain.

"I have no ship," replied the captain.

"I have no ship," replied the captain.

"I have no ship," replied the captain.

"I have no ship," replied the captain.

"I have no ship," replied the captain.

"I have no ship," replied the captain.

"I have no ship," replied the captain.

"I have no ship," replied the captain.

"I have no ship," replied the captain.

"I have no ship," replied the captain.

"I have no ship," replied the captain.

"I have no ship," replied the captain.

"I have no ship," replied the captain.

"I have no ship," replied the captain.

"I have no ship," replied the captain.

"I have no ship," replied the captain.

"I have no ship," replied the captain.

"I have no ship," replied the captain.

"I have no ship," replied the captain.

Use Rockets

For Take-Off Of Bombers To Give Quick Acceleration

A British aircraft authority said rockets are used in the take-off of the German Junkers 88 medium bombers to give quick acceleration.

Writing in the annual review of "Iron Age," said trade journal, G. C. Gray, known in the British aviation field, said such rocket-propelled starts have been used in the past.

Gray quoted an unnamed Netherlands flier as saying that "few things are more terrifying than to see a heavily loaded bomber full of bombs and gasoline falling off a night with a huge rocket blasting under the wing and knowing that if one engine fails, the whole thing will turn over and go up in one huge flame."

The author also reported that rockets are being used in another way by the Russians. He said two or three rocket bombs for ground attack are carried under each wing of the new Sturmovik bomber-fighter.

Gray said that the big, four-engine, P-51 Mustang, known for its speed, has been used to transport a party in a straight line with the course of the plane than it was their ordinary route.

Like Ghosts These Russians Advance On Nazis

This photograph shows white-clad Russian soldiers advancing through the woods during their successful attack against the Nazis in the Volzhsk-Kiev sector. The drive resulted in the Nazis being driven from the vital rail center and base of Volzhsk.

Manufactured Ice

Is Just Lowering The Temperature Of Water By Chemicals

"There's nothing artificial about manufactured ice—chemistry lowers the temperature of water—that's how it's done," said a chemist in the subject "Frozen Water," in C.T.L. Radio, the magazine of industry.

The article is more truth than poetry. There is in the assertion that a heavy artificial machine is used to make possible the transportation of vast quantities of perishable foodstuffs across the Canadian icebergs, no exaggeration. The technique is not new. The first Great War brought celluloid into use for dehydrated meats damaged in battle. The new technique promises well for making frozen foodstuffs for the future.

Quite A Showman

Story Told About Theodore Roosevelt

When He Was President Roosevelt is told of a visit to a delegation from Kansas to Theodore Roosevelt at Oyster Bay. They were met by a President, whose coat and collar were off.

"All gentlemen," he said, nodding his head. "I'm delighted to see you. You're right. But I'm very busy putting in my hour today. Now come down to the barn and we'll talk things over while I work."

"All gentlemen," he said, nodding his head. "I'm delighted to see you. You're right. But I'm very busy putting in my hour today. Now come down to the barn and we'll talk things over while I work."
